

CYPRUS AYDIN UNIVERSITY

RESEARCH AND DEVELOPMENT PROCESSES: THE PDCA CYCLE

Planning: Research and development activities at our University are monitored by the senior management and the Scientific Research Projects Commission (BAP). Academic staff are supported in their research activities through institutional mechanisms.

Implementation: The implementation of the University's research and development plans is carried out by faculties, institutes, and vocational schools.

Control: The monitoring and control of research and development plans are conducted by senior management and unit administrators through activity reports, as well as through the evaluation of the Research and Development Policy and the performance indicators defined in the Strategic Plan.

Action: Performance data, which are continuously monitored and reported by senior management, academic units, and the BAP Commission, are utilized to improve research objectives and targets, and necessary updates are implemented accordingly.
